

Q: What is Permanent Make-up?

A: Permanent Make-up is a form of cosmetic tattooing. Extremely small amount of natural pigments are inserted into the dermal layer of the skin. The result is "Permanent Makeup" a desired cosmetic effect that lasts for years.

Q: May I choose the color and shape?

A: Absolutely. In fact, nothing is done without your approval. First, we work with you to design the most attractive style and shape, based on your facial features and personal preferences. Then, individualized color is mixed according to your skin tone.

Q: How long does permanent makeup last?

A: With age, sun exposure, metabolism and natural skin exfoliation, it will fade somewhat after 2 to 5 years and can be freshened with a touch-up.

Q: What if I want to change the color after the procedure?

A: No problem. Permanent makeup works to enhance your natural beauty so that you look good all the time. It is applied in the skin and you can always apply conventional makeup on the skin to create the desired look.

Q: What is involved in the healing and the post care?

A: There will be a slight redness and swelling immediately after the procedure, which will disappear after a day or so. Postcare techniques will be discussed before your procedure.

Q: How long does it take and can it be completed in one visit?

A: Most procedures take approximately two hours. About a month following the initial application, a "touch-up" visit will be scheduled to perfect the lines and colors. There is no additional charge for this visit.

Q: Do the pigments pose allergy problems?

A: The application is just deep enough to penetrate the minute capillaries in the dermal layer of skin. There have been so few reactions to the pigments that some doctors are suggesting that the patch test be eliminated. You can develop an allergy to anything, anytime. Some doctors recommend that people with allergies have permanent cosmetic procedures, because they can replace cosmetic products that they are sensitive to. There have been very few reactions to pigments and only in the case of blue-based red pigments.

Imagine

Wouldn't it be wonderful not to have to worry about whether your eyeliner has smeared during the course of the day? Or to wake-up with already perfect eyebrows? With permanent make-up, your make-up can be perfect 24 hours a day -- even when you sleep or swim!!

Permanent Makeup

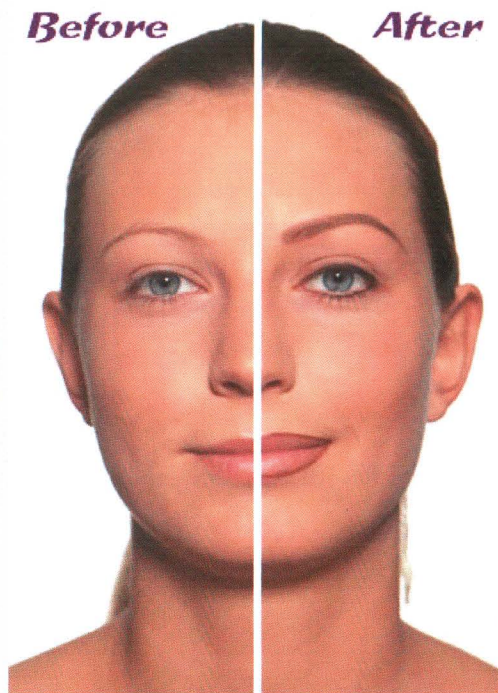

Helping You
Look Your Best!
All day,
Everyday

Reasons for having Permanent Makeup

- Natural looking alternative to your daily makeup routine
- Saves time for the active person
- Look your best at all times
- Enhances your natural beauty
- Accentuates, corrects, and/or reshapes lips
- Corrects uneven brows
- Fills in eyebrows
- Creates subtle eyebrows

Who could benefit?

- Busy professionals who need to look their best at all times
- People with active lifestyles
- Contact lens wearers
- Visually impaired people
- Conventional makeup allergy sufferers
- People with little or no brow
- Sufferers of unsteady or arthritic hands
- People with sparse and/or light brows and lashes
- Freedom seekers from daily makeup application

Eyeliner

Applied to the lash line to add natural definition and radiance. Giving sparse lashes a fuller and darker appearance. It can be applied very natural, sophisticated or dramatic in appearance... the choice is yours.

Lipcolor or Lipliner

As one ages, there is a loss of color and definition in the lips. Or you might think your lips are too small. With permanent lip liner, lips can be redefined, made slightly larger, and/or shaped more attractively. Your lipstick will not bleed anymore! You can swim, play tennis, and wake up with the custom blend of color that is right for you!!

Eyebrows

Permanent Make-Up is the ideal medium to create a perfectly shaped and proportioned set of eyebrows, with a look that lasts for years. Beautifully shaped, natural looking eyebrows, that Permanent Make-Up achieves, has the effect of not just accentuating the eyes, but also harmonises all of the face leading to a more attractive look.
